Hi Bill,

I wanted to write to you to say thank you a lot sooner, but time after the wedding slipped away. After the wedding Yukari and I ran off to our honeymoon and a week after we got back, she was already back in Japan. Now we are waiting on paperwork and counting down the days until I make a move there.

David was an awesome DJ and he did an excellent job of reading the crowd. He was extremely professional, a lot of fun, and didn't mind going along with my friends/guests' different shenanigans. I've received countless compliments from our guests stating how great our DJ was and how everybody had a great time.

He also did a great job with the up lighting. The day of the event, before the ceremony, I was able to meet with David and after he saw the room, he double checked what color we wanted. Due to the amount of orange already in the room, we decided to change it and he had no trouble getting it adjusted and looking great.

One of the things that stands out to me and really helped to illustrate just how skilled David really is, was when there was a miscommunication with Yukari and her father, which had them both end up stepping onto the dance floor 1 song too early. David did an awesome job of seamlessly blending the current song into the song they had chosen for their dance. It was one of the smoothest transitions I have ever heard and most of the guests didn't even notice the song changed.

Despite only meeting with you two times prior to the event, Yukari and I knew that you and your DJ's were going to do a great job and we were right on. Thank you again for all of your support and suggestions throughout the entire planning process, as well as for giving us such a great DJ on the day of our event. You both really helped to make it into an amazing day and helped to make it even more unforgettable.

We were both extremely impressed and are very grateful.

Thank you,
Brad & Yukari Wollner
